

Pioneering a Trillion-Dollar Industry in Conscious Living in Spiritual Transformation

Introducing the Star Light Soul Tribe (SLST) Subscribers

In a groundbreaking fusion of conscious living lifestyles and sustainable development, GOE Investment Group Inc (GOEIG), proudly unveils a revolutionary groundbreaking global demographic paradigm called the **Star Light Soul Tribe (SLTS)** subscribers that is the pioneering movement powering a trillion-dollar industry in multiple global markets monetizing eco-conscious living.

GOEIG is expanding its international SLST data base with mind/body/spirit/wellness consortium partners and merging it with eco village development marketing and branding into a convergence of the SLST demographic dedicated to the evolution of the lives of the awakened and the co-evolution of our world. This convergence positions GOEIG as a leader in the flourishing cross-promotional global markets of sustainable green building, intentional community living and mind, body, health wellness lifestyles.

This new SLST demographic defies traditional advertising agencies demographics, psychographics/metrics that are based on old paradigm of Nielsen ratings' skews. GOEIG is poised at the forefront of this momentous cultural shift, preparing to leverage the immense potential of the Star Light Soul Tribe movement into four monetized global markets.

There are four (4) top affiliate markets that can be monetized effectively for investors looking to profit from the Star Light Soul Tribe evolutionary movement:

1. **Eco Villages, Off Grid Intentional Communities, Affordable Housing, Green PUD's, Smart Cities**

Explosive global market in sustainable living, eco village community living, smart cities combined with affordable housing, off-grid living, promoting permaculture design using integrated engineering, green building materials, renewable energy solutions, community gardens, food forests, organic food production technologies, water harvesting systems, sustainable building practices, community centers with diverse community programs, food markets, child care, community parks.

2. **Live Events, Performances, Festivals, Concerts, Expo, Summits**

Eco-conscious, geotourism, sustainability, conscious living themed events integrate with live events, performances, festivals, concerts, expos align with self-sustainable green living to celebrate life, music, art, community; eco-conscious festivals and expos showcase innovative green technologies and sustainable solutions, performances teaching the principles of sustainability and conscious living. Affiliate partnerships provide lodging for live events and conferences.

3. **Retreats, Resorts, Workshops, Conferences, Seminars, Podcasts, Farm to Table Organic Cuisine**

Partnering with organizations that host retreats, resorts, transformative workshops, conferences, seminars, podcasts, on-line programs focusing on holistic wellness, mind, body, spirit in personal growth, health, spiritual growth, sustainable living, personal development, alternative medicine/energy medicine, meditation, metaphysical knowledge, consciousness expansion, life coaching, transformation, empowerment, spiritual leadership; Integrating sustainable living values with Farm to Table principles with community gardens, food forests, organic food, permaculture design, CSA's (community Supported agriculture) that promote holistic wellness, green living and sustainable health; establish affiliate marketing networks using--cross promotion campaigns in point of sale, social media click funnels, crowd-funding, engagement programs, community project partnerships.

By strategically aligning with affiliate programs in these markets, investors can capitalize on the growing demand for products and services tailored to the interests and values of the Star Light Tribe Evolutionary Subscribers, thus maximizing profit potential in this emerging trillion-dollar industry.

As the world witnesses the exponential expansion of this dynamic demographic, leading aggregators and affiliate marketing experts are forecasting a trillion-dollar opportunity in the burgeoning cross-promotional market of conscious living, sustainable eco villages, and mind/body/spirit/health wellness industries.

Star Light Soul Tribe Subscribers (SLST) are a full mixture of Gen Z, Millennials, Gen X, and Baby Boomers who are awakening, pursuing and actively engaging into the cross-pollinating conscious living lifestyles and are characterized as:

Leading-Edge-- Consciousness Information, Resources, Teachings

- Conscientious individuals harboring a deep concern for the well-being of the earth, humanity, nature
- Actively champion positive change and growth for themselves and society
- Pursue ecological and sustainable world solutions, green building, Permaculture design and green technologies
- Seeking avenues that foster expansion, transformation, and advancement across all facets of life
- Engaging in consciousness-raising programs, women's and men's empowerment trainings
- Embracing a spiritually minded ethos in unique, distinctive approaches to personal development
- Attracted to new thought leaders-- spiritual teachers transformational coaches, philosophers, researchers, scientists

Retreats, Workshops, Summits, Expos, Conferences, Pod Casts, On Line Programs

- Drawn to live events with diversity of social interaction, entertainment, edutainment Spiritualtainment, on site lodging
- Inspired, to network and to engage in events that educate, inform with breakout workshops, lectures, seminars
- Passionate about retreats, relax, rejuvenate, reflect on past, recharge, refocus, quiet, secluded, rest, prayer, meditation
- Desire workshops to learn, implement, plan, get hands-on training, relationship, personal growth, spiritual development
- Product-based entrepreneurs who want to take their craft to another level, service-based entrepreneurs
- Drawn to online resources, prominent figures in life coaching, transformation, empowerment, spiritual leadership

Mind, Body, Health Wellness, Spirituality, Expanding Consciousness, Well-Being

- Looking for holistic health breakthroughs, well-being, personal growth, alternative medicine, self-actualization tools
- Exploring new spirituality, mindfulness trainings, metaphysical knowledge, indigenous/shamanic wisdom, mysticism
- Attracted to community-oriented gatherings where life-minded congregate, connecting to soul tribe
- Intrigued with energy healing, spiritual healing/tools, quantum healing, chakra healing, bioenergy healing
- Stimulated by frequency medicine, sound healing, quantum science, consciousness studies, ayurveda, alchemy
- Captivated with mediation, yoga, tai chi, qigong programs, workshops and mind, body, spirit practices
- Actively seeking out of next-level consciousness resources, new paradigm spiritual courses, astrology, paranormal
- Devoted to psychics, mystics, astrologers, past life regression, clairvoyants for expanding spiritual growth
- Expanding Consciousness resources for ascension teaching, pathways towards Universal Unity Consciousness

Festivals & Concerts, Live Performances

Wanting to be updated on Festivals, Concerts, Live Performance events; Searching for innovative art and music, sound and energy healing, creative dance and arts, ecstatic dancing Seeking music events with multi-media events, live performances

<p>Green Living Expos Mindfulness Retreats Organic Farming Expos Eco-Friendly Seminars Wellness Workshops Sustainable Living Conferences Health and Nutrition Conventions Tai Chi & Qigong Workshops</p>	<p>Holistic Health Fairs Conscious Living Retreats Sustainable Agriculture Workshops Zero Waste Seminars Plant-Based Cooking Classes Environmental Conservation Conferences Yoga and Meditation Retreats Organic Gardening Workshops</p>	<p>Outdoor Adventure Retreats Renewable Energy Expos Permaculture Workshops Art, Photography, Fashion Shows Wildlife Conservation Seminars Community Gardening Events Cleansing and Detox Retreats Spiritual & Rejuvenation Retreats</p>
---	---	---

Conscious and Loving Relationship

Profound interest in personal and spiritual growth in existing relationship, healing trauma and self empowerment
Attracting relationship partner; law of attraction in manifesting a partner, manifesting love & relationships, rebuilding love
Cultivating self-awareness & core values, developing internal transformation and external actualization

UFO's, Disclosure, ET's, Star Seeds

Avid viewers in UFO and ET disclosure, windows into galactic civilizations, portals, multidimensional realities, abductions
Seekers of breakthrough interviews, reports, whistleblowers, US government/Pentagon Intelligence reports, time travel

Eco Villages, Off Grid Intentional Communities

Enthusiast of intentional communities with like-minded residents live in sustainable off-the-grid communities
Admirers in renewable energy, organic gardens, natural water eco-systems, green built homes
Connoisseurs of natural home building with sustainable green building materials
Fostering conscious and harmonious relationship skills with nature, eco systems and permaculture design
Bridging sustainable building in a marriage of nature and permaculture technology
Committing to ecological responsibility and being land stewards
Incorporating sustainable building materials-Hemp, Adobe, Cob, Strawbale, White block, Rammed earth, Ocean containers
Using non-harmful integrative engineering to set new standards for environmentally conscious living

SLST are naturally drawn to the following attributes of sustainable living and Eco-Village Developments:

1. **Eco villages:** green sustainable residential communities, off-the-grid communities designed and built in harmony with nature's eco-systems using permaculture design systems and non-harmful integrative engineering
2. **Green Built Sustainable Homes:** using green materials including Hemp, Adobe, Cob, Strawbale, White block, Rammed earth, Ocean container
3. **Organic Food Production:** Forest gardens, edible landscapes, community gardens, mixed fruit and tree groves, automated greenhouses, vine gardens, and herb gardens provide a bounty of organic produce
4. **Pure Uncontaminated Water:** Wells, aquifers, springs, and chemical-free water sources ensure a pristine water supply free from chlorine, fluoride, insecticides, pesticides, and herbicides.
5. **Pure Uncontaminated Water:** Wells, aquifers, springs, and chemical-free water sources ensure a pristine water supply free from chlorine, fluoride, insecticides, pesticides, and herbicides.
6. **Water Harvesting and Distribution:** Using advanced technologies for water harvesting, rain capture, water recycling, creeks, canals, reservoirs, ponds, and swales to establish sustainable water systems.
7. **Renewable Energy:** Solar, solar battery systems, micro-hydro, hydroelectric, hydrokinetic, and micro-hydrokinetic
8. **Community Event Centers/Clubhouses:** with activities in music, art, transformation events, workshops, seminars, dinners, banquets, performances
9. **Cultural and Artistic Spaces:** Dining rooms with stages, amphitheaters, open sides yurts host live performances, concerts, festivals, orchestras, bands, choirs, theatrical performances, and community fairs
10. **Community Employment and Work Trade:** community employment, offering jobs, internships, apprenticeships, green community programs; residents trade services, skills, expertise in a thriving barter system
11. **Temporary Living Quarters:** work trade services provide temporary living quarters, fostering a sense of community and shared responsibility
12. **Community co-op Utilities:** all utilities provides at co-op cost--pure water, renewable power, organic food, trash, biological living sewage

13. **Organic Animal Ranching:** all animals raised in organic ranch with grass fed animals on wild, natural pasture with no hormones, antibiotics, GMOs, pesticides, herbicides, insecticides, or synthetic materials
14. **Permaculture Design Certificate Programs:** include Eco village design, urban planning, green home building; forest gardens; greenhouses, edible landscapes, fruit & nut tree groves, water systems, swales and berms, animals and livestock; renewable energy, compost & soil composition management, self renewed living fences
15. **Non-Requirement of Religion but Spiritual:** subscribing to no one particularly required religious dogma but accepting all residents with any religious faith, belief system or spiritual practices; not following any one exclusive religion but subscribing to communities that embraces the Love where Life, Liberty, Happiness, Success and Abundance is only possible through the Unity of Body, Mind & Soul in Perfect Harmony with Nature, with the Infinite Supreme Intelligence and the Supreme Wisdom of the Universe

SLST is Attracted to SUSTAINABLE LIVING, PERMACULTURE DESIGNS INTEGRATED INTO GREEN CONSCIOUS LIVING

Sustainability Features in a GOEIG Inc Eco Village Permaculture Design System

The GOEIG eco village design systems demonstrate a commitment to community self-sustainability with renewable power for zero net energy consumption, organic food production, and clean non-chemical water consumption. Environmental stewardship is practiced by combining permaculture designs with integrative engineering by responsibly managing water resources, minimizing impact on local ecosystems, and promoting ecological balance.

1. Green Building Homes using Sustainable Building Materials

Smart apartment building/smart sensor, Hemp, hemp SIP's, bioceramic cement

2. Renewable Energy Solar Panels

Zero net energy (ZNE) building

3. Community Full-Season Gardens & BioDomes

Providing organic foods; fruits, nuts, vegetables, herbs

4. Community Market

Organic foods from gardens, biodomes, automated green houses, food forests, edible landscapes

5. CSA (Community Supported Agriculture)

Program where residents pay monthly fee to receive organic food

6. Permaculture Design Landscapes with Smart Irrigation Systems

Reducing water usage, swales, ponds, creeks, lakes

6. High Efficiency Water System

A. Water Conservation-- low flow water fixture

B. Rainwater Harvesting-- capture and store rainwater for later use, irrigation, flushing toilets

C. Gray Water Recycling--redistribute capture water from sinks/showers/washing machines for irrigation, flushing toilet

D. Water-Efficient Appliances & Fixtures-- low-flow toilets, high efficiency washing machines, low-flow faucets,

E. Smart Irrigation Systems-- smart irrigation controller conservation that adjust watering schedules, soil moisture

F. Drip Irrigation-- deliver water to the root zones of plants, reducing water wastage through evaporation & runoff

G. Water Metering and Monitoring-- monitoring systems track water usage, identify leaks, conserve waste

I. Drought-Tolerant Landscaping-- landscapes with native and drought-tolerant plants using biodiversity reducing irrigation

8. Water Purification Systems

Community Charcoal Filter System; Ultraviolet Light, (UV) Reverse Osmosis home units

9. Green Waste Management

Comprehensive waste segregation system categorizes waste into recyclables, compostables, non-recyclables, Recycling trash, recycling grey water,

10. Car Free Community

Car free residential clusters with pedestrian-focused layout, mixed-use development, cycling infrastructure with green spaces with integrated gardens; lighted walkways with **functional** gathering places with community interaction in communal spaces **and** access to essential services

11. Shared Electric Buggies, Gold Carts with Free Charging Stations

Fleet of electric buggies are shared among residents; used for short-distance transportation within the community, commuting to community center, organic food market, visiting neighbors, running errands. Residents access electric buggies through a user-friendly booking system to reserve a buggy for a specific period.

12. Walkable Community Design with Close Proximity to Amenities, Services

Community site design creates environments where residents can easily and comfortably walk to access amenities, services, recreational areas to provide a healthy, sustainable, and community-centric lifestyle that reduces reliance on automobiles

13. Animal Sanctuary Provides Many Benefits

Animal sanctuary integrated with an eco village contributes to sustainability, self-sufficiency, community engagement, educational and recreational opportunities.

A. Organic Food

Chickens, goats, and other animals provides an organic food source in eggs production, milk, cheese, and other dairy products

B. Natural Pest Control

Chickens contribute to the eco village by providing natural pest control, helping maintain a balanced and eco-friendly environment.

C. Vegetation & Pasture Management

Goats are used as eco-friendly lawnmowers to graze unwanted vegetation in meadows, pastures, and communal areas. This selective grazing can integrate natural, sustainable practices to help in keeping vegetation at an optimal height, which is beneficial for maintaining healthy pastures and promoting biodiversity by preventing the dominance of a single plant species.

D. Fire Prevention

Goats play a vital role in reducing the risk of fires by keeping dry grasses and vegetation in check. This natural fire mitigation strategy is particularly valuable in fire-prone regions.

E. Workshops and demonstrations

Educational Tours with workshops and demonstrations show the role of goats in ecosystem health that enhance community engagement and awareness.

F. Petting Zoo and Events

Small petting zoo within the sanctuary can host events, birthdays, celebrations, tours, educational programs for children with entrance fee or event fees.

G. Farmers' Market Participation

Participate in local farmers markets to sell surplus produce and products from the animal sanctuary that generates income and increases the visibility and marketing of eco village

H. Regenerative Agriculture

Implement regenerative agriculture practices within the animal sanctuary, emphasizing soil health, biodiversity, and closed-loop nutrient cycles. This aligns with the eco village's commitment to sustainability

I. Composting Programs

Composting programs use organic waste from the animal sanctuary. The resulting compost can be used to enrich the soil in community gardens or sold to residents as a sustainable soil amendment.

J. Green Energy Integration

Solar green energy supplies the energy needs of the animal sanctuary that enhances the eco village's commitment to sustainable and renewable practices

14. Horse Equestrian Center

The Horse Equestrian enhances the community connection with nature, provides recreational opportunities, and support sustainable practices. The Horse Equestrian Center provides residents with a direct and meaningful connection with nature, fostering a sense of well-being and appreciation for the environment. Equestrian activities create opportunities for residents to connect, share experiences, and build a strong sense of community. Horseback riding and equestrian activities contribute to residents' physical fitness, mental well-being, and overall quality of life. Well-designed equestrian facilities and natural-fed pasture land contribute to the aesthetic appeal of the ecovillage, enhancing the overall beauty of the community. In summary, a green, sustainable Horse Equestrian Center can be a valuable addition to an ecovillage, promoting community engagement, education, and sustainable land management while offering recreational and therapeutic benefits to residents.

A. Horse Track for Riding & Training

Permaculture design uses Natural landscape, taking advantage of existing contours and vegetation using Use permeable materials for track surfaces to minimize runoff and promote water absorption

B. Equestrian Lessons and Programs

Equestrian lessons and programs for residents of all ages; Providing educational sessions on horsemanship, riding techniques, and the care of horses.

C. Riding Arenas

Riding arenas designed for various equestrian activities, including dressage, jumping, and training; eco-friendly footing materials that provide good traction while minimizing dust.

D. Therapeutic Riding Programs

Local therapists provide therapeutic riding programs for individuals with physical, emotional, or cognitive challenges.

E. Community Events

Community events, horse shows, and competitions bring residents together and encourage participation in equestrian activities for all skill levels.

F. Trail Riding

Scenic trails within the ecovillage and outside nature trails for horseback riding, promoting a connection with nature and sustainable outdoor recreation

G. Equine-Assisted Therapy

mental health professionals and Horse Whisperers provide equine-assisted therapy sessions, leveraging the therapeutic benefits of interacting with horses.

H. Workshops and Seminars

Workshops and seminars provided on sustainable horse care, natural horsemanship, and responsible land management practices.

I. Sustainable Green Stables

Eco-friendly stables Design using sustainable materials and implement proper waste management systems for horse bedding and manure and using natural ventilation and lighting to reduce energy consumption.

J. Natural-Fed Pasture Land

Pastures have diverse, native vegetation for natural feeding; rotational grazing is used to maintain pasture health and prevent overgrazing; sustainable land management practices include composting manure to enrich the soil

K. Community Gardens

Community gardens are designed near the equestrian center, where horse manure can be composted and used as organic fertilizer for crops.

L. Solar-Powered Facilities

Solar panels on roofs to harness renewable energy for lighting, heating, and other electrical needs
Solar Pumps and solar water heaters for washing and cleaning facilities

M. Rainwater Harvesting

Rainwater harvesting systems collect water for horse watering, irrigation, and facility maintenance; permeable surfaces to allow rainwater to infiltrate the ground and replenish aquifers.

N. Education and Skill Development:

The Equestrian center offers educational programs that enhance residents' knowledge of horsemanship, sustainable practices, and responsible land stewardship

O. Sustainable Land Management:

Integrating natural-fed pasture land and implementing sustainable practices contributes to the ecovillage's commitment to environmental conservation and responsible land use.

P. Local Economy and Tourism

Hosting events and offering equestrian services can attract visitors from outside the ecovillage, contributing to the local economy and promoting sustainable tourism.

Q. Diverse Housing Options

The equestrian center expands in Phase 2 and Phase 3 to the development of eco-friendly housing options with private horse stables and equestrian-themed residences.

R. Sustainable Practices Showcase

The equestrian center can serve as a showcase for sustainable practices, inspiring other communities to adopt similar eco-friendly initiatives.

S. Resilience and Self-Sufficiency:

The Horse Equestrian Center aligns with the ecovillage's goals of resilience and self-sufficiency by incorporating sustainable practices in both recreational and agricultural aspects

15. Sustainable Pool & Jacuzzi

Green Sustainable design systems include solar power, solar heating and solar pumps; Eco-friendly UV ultraviolet light filtration system is chemical-free; Green LED lighting system; Pool and Jacuzzi contributes to a strong sense of community and environmental sustainability with community gardens around the pool area showcasing sustainable gardening practices that foster teamwork, communication, and community spirit.

16. Community Center

Community Center is a multi-purpose community center providing many amenities and services including a commercial kitchen with dining room with performance stage. Communal dining tables promote a sense of community harmony and encourages shared meals and fostering community sharing. Diverse activities and events include recreation room; sustainable living workshop programs; mind/body/wellness/fitness; youth programs; cultural & social events, job & career development program; educational programs, community meetings. Communal dining tables promotes a sense of community harmony and encourages shared meals and fostering community sharing

The Community Center Club House Programs and Activities

The 2-community center is designed in a large 2 story clubhouse with a wide range of Community programs, activities and amenities to serve the diverse needs and interests of the community residents and also provide programs for outside community members. Some of the activities and programs that are created for outside community members will receive funding from sponsors, grants, fund raising programs, donations, benefactors, municipality programs.

Eco Village Clubhouse is a sprawling two-story architectural marvel that serves as the ultimate haven for creativity and community. The Clubhouse serves as the ultimate nucleus for visitors, guests, residents to meet and greet in never ending exciting events, parties, get-togethers, banquets, gatherings, wine cocktails, workshops, seminars and meeting rooms, dining, games in the recreation room, watching documentaries & movies in the TV lounge, soaking in the Jacuzzi, multi-events on the performance stage, playing cards, reading books in the library, playing a billiard game, strolling through the courtyard gardens with lighted pathways, having engaging conversations in the Octagon gazebo, front porch, back patio table and chairs settings.

The GEO Eco Village Clubhouse is designed with a vision to foster a sense of belonging, nurturing connections that transcend boundaries, and cultivating experiences that leave an indelible mark on the soul through innovative vineyard retreats combining vineyard eco tourism with sustainable living and mind, body and wellness retreats. The Eco Village Clubhouse isn't just a place, it's an invitation to embrace the extraordinary and create memories that will be cherished for a lifetime.
